Rope & Twine Manufacturers Since 1856

## Manila Rope Range

Manila rope is manufactured from the natural fibres sourced from the Abaca plant grown in the Phillipines known as 'manila hemp'. This rope is strong and durable but as it's made of natural fibre it is more prone to natural decomposition over time than man-made synthetic rope is. Manila rope looks visually very appealing and holds knots well and is often used for landscaping. As over a long time manila rope is 100% biodegradable it's also environmentally friendly.

### Ideal for

Ideal for Landscaping, Decking, Tug o' War, Railing Rope, Block n Tackle, Stair Rope, Construction, General Purpose

## Manila Rope Sizes - 220m Coils

6mm 8mm 10mm 12mm 14mm  
16mm 18mm 20mm 22mm 24mm  
28mm 32mm

Rope & Twine Manufacturers Since 1856

## Sisal Rope Range

Sisal makes for a very strong durable and hard wearing three strand rope ideal for general purpose use. It has excellent resistance to sunlight, little stretch and good knot holding ability. Larger diameters are often used as a garden decking rope or barrier rope. Smaller diameters are sometimes used for decorative purposes and as it is 100% natural and biodegradable it is ideal for use with pets and animals such as for cat scratchers and parrot toys.

### Ideal for

Landscaping, Decking, Cat Scratchers, Stair Rope, Boats, Ornamental, General Purpose.

## Sisal Rope Sizes - 220m Coils

6mm 8mm 10mm 12mm 14mm  
16mm 18mm 20mm 24mm 28mm  
32mm

Rope & Twine Manufacturers Since 1856

## Polyhemp / Hempex Rope Range

Our synthetic hemp rope is a three strand rope that does not shrink in length or expand in diameter when wet. As it is made from polypropylene, polyhemp rope looks and feels like natural hemp, while retaining the hard wearing qualities of a synthetic rope that will not biodegrade outdoors. These characteristics make it ideal for outdoor use and it is extremely popular for use as a decking railing rope, in children's play areas, in the garden and general landscaping projects.

### Ideal for

Landscaping, Decking, Children Play Areas, Rope Swings, General Purpose

### Polyhemp Rope Sizes - 220m Coils

6mm 8mm 10mm 12mm 14mm 16mm  
18mm 20mm 24mm 28mm 32mm

# James Lever

Rope & Twine Manufacturers Since 1856

## Cotton Rope Range

Our natural three strand cotton rope is made from high quality 100% cotton yarn. Our cotton rope is smooth and soft in feeling and is unbleached giving it a natural colour. It is favoured by users for horse halters, pet toys, as a barrier/boundary rope and also has many decorative, craft and artistic uses. Cotton rope can also be easily dyed to produce coloured rope.

### Ideal for

Lead Ropes, Tie Down Harness, Hobbies, Decorative and Craft

## Cotton Rope Sizes - 110m Coils

20mm 24mm 28mm 32mm

# James Lever

Rope & Twine Manufacturers Since 1856

## 3 Ply Jute Rope Range

Our natural 3 ply jute rope is 100% biodegradable, re-recyclable and environmentally friendly. It is made from long hairy jute fibres that are spun into coarse, strong strands which are twisted to form a rope with high tensile strength, low extensibility and that remains strong when wet.

Jute rope is made from the fibres of the genus *Corchorus* plant, originating mainly in the Indian sub-continent. It has a silky golden shine which gives it the name 'The Golden Fibre'.

### Ideal for

Use in home and garden, arts & crafts and decoration. Also used as sash cord, pulley line or as a traditional clothes line.

### Jute Rope Sizes

- upto 1000m Coils

5mm 6mm 7mm 8mm 10mm
